

PRODUCT BULLETIN

ISSUE/DATE:	Jan 2024	BULLETIN NUMBER:	23-PB-CV-UVSWIFTBEV PMO OBSOLESCENCE
TOPIC:	UVSWIFTBEV PMO OBSOLESCENCE	PRODUCT LINE:	SWIFTBEV PMO

OVERVIEW

The Aquafine SwiftBev PMO was introduced in 2017 to provide UV treatment to comply specifically with the Pasteurized Milk Ordinance PMO under the FDA, which required the UV system have 1 sensor per lamp.

Forthcoming changes to the with the Pasteurized Milk Ordinance remove the requirement for 1 sensor per lamp, making the Aquafine SwiftBev PMO redundant with the standard Aquafine SwiftBev product. As a result, Trojan has made the decision to discontinue production of the PMO variants of the Aquafine SwiftBev product.

It is important to note that service and replacement parts, such as lamps, sleeves, ballasts, control circuit boards and wiper seals will continue to be stocked and available.

Aquafine continues to support applications within the dairy market. If compliance with the Pasteurized Milk Ordinance is required, please reach out to your local representative to determine if the Aquafine SwiftBev is a suitable replacement.

AN IMPORTANT DATE: March 29, 2024

Please assess your product needs and place a final order no later than March 30, 2024. Aquafine will not accept orders for the above stated products after this date. All deliveries to customers must be completed before December 30, 2024.
