

PRODUCT BULLETIN

ISSUE/DATE:	May 2024	BULLETIN NUMBER:	24-PB-CV-LOGIC MODEL OBSOLESCENCE
TOPIC:	AQUAFINE LOGIC™ MODEL OBSOLESCENCE	PRODUCT LINE:	AQUAFINE LOGIC

OVERVIEW

The Aquafine Logic series was first introduced in 2001 to provide UV treatment for a variety of industrial and commercial applications. Since then, it has been installed in industrial and commercial facilities around the world and is relied upon to provide effective water treatment.

At Aquafine, we continually review all aspects of our business to ensure we are providing best in class quality product, effective and efficient service to our customers. As a result of this review, Aquafine has made the difficult decision to discontinue production of select Aquafine Logic models. Please see below for the table of discontinued and available models.

It is important to note that service and replacement parts, such as lamps, sleeves, ballasts, control circuit boards and wiper seals will continue to be stocked and available.

In place of the Aquafine Logic models no longer supported, as shown in the table below, please consider OptiVenn, TrojanUVFit, or TrojanUVSwiftSC product lines. Please contact your local representative or visit the product links below for more information.
